Real World Balanced Index

Croft Financial Group uses the "Croft RealWorld Indexes" as passive benchmarks. These are three globally diversified index-based portfolios based on the FPX Indexes originally co-developed by Richard Croft.

These indexes are diversified by asset mix and geographic region, and are rebalanced semi-annually. What makes these benchmarks different is that they are investable, and they include a basket of index-based exchange traded funds. The Croft RealWorld Indexes take the process a step further and adjust the FPX Indexes for a 1% management fee, about the average fee paid by Canadian investors for portfolio management.
